

## REAR MOUNT PUMPER | WALK-AROUND RESCUE

### GSO 8589 | JACKSON TWP, PA

Jackson Township VFC chose the Rear Mount pump setup for their new Rescue Engine, allowing maximum storage for their rescue equipment. Capitalizing on the full height full depth 29" deep side compartments, KME was able to customize nearly every square inch of space for the Jackson Township VFC. Pump panel space was minimized with the use of electric valves, and custom saw and tool mounting completed the package.
