

## >>>> CUSTOM HEAVY RESCUE

### GSO 8839 | HAZLE TWP, PA

The Hazle Township, PA heavy walk-around rescue is a unit designed for maximum storage capabilities, six (6) pre-connected hydraulic tool reels, a 6-bank cascade air system and an onboard 30,000 watt hydraulic generator with scene lighting and electrical reels. The variety and quantity of shelving on this rescue was maximized to give the fire department the most functional equipment storage possibilities. Utilizing KME's custom rescue body design, the rear of the body was designed to store a standard ladder compliment and stokes basket without intruding into the body side compartments and front transverse storage compartments.
